PUBLIC SERVICE COMMISSION OF WISCONSIN

Application of the Village of Harrison, Calumet County, Wisconsin,
as a Water Public Utility, for Authority to Adjust Water Rates

6335-WR-103

FINAL DECISION

This is the Final Decision in the Class 1 proceeding conducted by the Public Service Commission (Commission) on the application of Harrison Utilities (applicant) for approval to increase water rates. This application is APPROVED, subject to conditions.

Introduction

The applicant applied to the Commission on June 27, 2019 for authority to increase water rates. Pursuant to due notice, the Commission held an audio hearing on October 13, 2020 before Administrative Law Judge Michael E. Newmark. The parties, for purposes of review under Wis. Stat. §§ 227.47 and 227.53, are listed in Appendix A. The City of Menasha requested and was granted intervenor status in this proceeding. ([PSC REF#: 375252.](#))

Findings of Fact

1. The applicant's presently authorized rates for water utility service will produce operating revenues of \$1,253,118 for the 2019 test year. These rates fall short of the test year revenue needed by \$80,332 and are unreasonable.
2. The estimated net investment rate base applicable to water utility operations for the 2019 test year is \$1,176,640.

3. The rate changes set forth for water service in Appendix C will permit the applicant to earn the necessary revenue requirement and are consistent with the cost of service and rate design.

Conclusions of Law

1. The applicant is a municipal public utility as defined in Wis. Stat. § 196.01(5)(a).
2. The Commission has authority under Wis. Stat. §§ 196.02(1), 196.03(1) and (3), 196.19, 196.20, 196.22, 196.37(1), (2), and (3), and 196.395 to authorize the applicant to increase water utility rates and revise tariff provisions.
3. The Commission has authority under Wis. Stat. § 15.02(4) to delegate to the Administrator of the Division of Water Utility Regulation and Analysis (Division Administrator) those functions vested by law as enumerated above and has delegated the authority to issue this Final Decision to the Division Administrator.

Opinion

Net Investment Rate Base

The estimated net investment rate base for the 2019 test year is as follows:

Utility Financed Plant in Service	\$2,176,682
Less: Accumulated Provision for Depreciation	<u>\$919,172</u>
Net Plant in Service	\$1,257,510
Plus: Materials and Supplies	10,465
Less: Regulatory Liability for Pre-2003 Accumulated Depreciation - CIAC	<u>91,335</u>
Net Investment Rate Base	<u>\$1,176,640</u>

Comparative Income Statement

Commission staff submitted a revenue requirement for the test year as shown in Ex.-PSC- Revenue Requirement-r. ([PSC REF#: 393034](#)). The estimated test year income statement showing the effect of the increase in revenue that will result from authorized rates is as follows:

	<u>At Present Rates</u>	<u>Authorized Increase</u>	<u>After Rate Increase</u>
Operating Revenues	\$1,253,118	\$80,332	\$1,333,450
Operating Expenses:			
Oper. & Maint. Exp.	\$1,075,860		\$1,075,860
Depreciation	62,701		62,701
Taxes & Tax Equiv.	<u>130,337</u>		<u>130,337</u>
Total Oper. Expenses	<u>\$1,268,898</u>		<u>\$1,268,898</u>
Oper. Income (or Loss)	<u>(\$15,780)</u>		<u>\$64,552</u>
Rate of Return	NA		Allowance

Commission staff computed the depreciation expense included in the revenue requirement for the 2019 test year using the depreciation rates shown in Appendix E. For purposes of computing the depreciation expense on the average investment for each plant account, these depreciation rates are effective as of January 1, 2019.

Capital Structure

The applicant requested an increase based on an allowance of approximately 6 percent of operation and maintenance expenses due to the applicant’s relatively low rate base. The authorized revenue increase will allow a net operating income of \$64,552, which is approximately 6 percent of operation and maintenance expenses. This amount represents an allowance for earnings fluctuations that is consistent with past Commission decisions in rate

Docket 6335-WR-103

cases in which there was a low or no rate base to provide a rate of return. An allowance of \$64,552 will provide the applicant with sufficient earnings and will also maintain confidence in the applicant's financial integrity without resulting in rates to customers that are excessive.

Potential Unauthorized Construction

In 2002, the applicant constructed a new building without obtaining a Certificate of Authority from the Commission. Commission staff opened an investigation into this issue in docket 4325-WI-100, and on September 13, 2019, Commission staff issued a data request in the investigation. ([PSC REF#: 375762.](#)) On May 21, 2020, the Commission issued a Letter of No Action to the applicant. ([PSC REF#: 389857.](#)) Commission staff included the cost of the project in the proposed revenue requirement Exhibit. ([PSC REF#: 393034.](#)) Consistent with staff's analysis, the Commission finds it is reasonable to include these costs in the rate base for this rate case.

Facilities Connection Fee

During review of the applicant's PSC Annual Reports, Commission staff discovered that the applicant funded the construction of two meter stations and several other smaller additions using Facilities Connection Fees collected from all new water customers. The applicant established the Facilities Connection Fees in 1983 when it constructed the original water system. The applicant updated the fee several times between 1984 and 1997. The current Facilities Connection Fee is \$975, which includes a charge for both water facilities and sewer facilities. The applicant collected a total of \$2,337,588 from customers since 1983, with \$87,908 levied as water special assessments, \$125,602 levied as sewer special assessments, and \$2,124,078 charged as Facilities Connection Fees. ([PSC REF#: 388379.](#)) The applicant provided additional

Docket 6335-WR-103

information to support its determination that 14 percent, or \$297,371 of the Facilities Connections Fees it collected, supported drinking water facilities. ([PSC REF#: 388379](#) and [PSC REF#: 388452](#).) All water charges a water public utility assesses must be authorized by the Commission. Public utilities are not permitted to charge rates other than those on file with the Commission. (Wis. Stat. s. 196.22.) The applicant must stop charging the Facilities Connection Fee that was not authorized by the Commission. In addition, the Commission finds it reasonable to require the applicant to refund the \$297,371 in water Facilities Connection Fees it has collected from water customers.

Because the Commission did not authorize the Facilities Connection Fee, the applicant's entries for additions funded by the fees as Contributed Plant in 2009-2018 are incorrect. Additionally, the applicant recorded plant funded by the \$87,908 of special assessment revenues incorrectly. The Commission staff revenue requirement includes adjustments that result in plant properly recorded as either Contributed Plant or Utility Financed Plant. The applicant submitted a revised 2019 PSC Annual Report on October 23 2020 that included adjustments consistent with proper recording of plant.

Information Filed After the Hearing

The hearing for this proceeding was held on October 13, 2020. On October 19, 2020, Donald Merkes, the City of Menasha mayor, filed comments that the applicant's Payment In Lieu of Taxes (PILOT) expense was overstated, because it was calculated based on all utility assets and did not exclude plant located outside the Village limits. ([PSC REF#: 398520](#).) On November 13, 2020, the applicant filed a response and agreed that the PILOT expense was calculated incorrectly and that only assets located in the Village of Harrison should be included

Docket 6335-WR-103

in the PILOT calculation. ([PSC REF#: 400016.](#)) The applicant estimated that 51.25 percent of its assets are located within the Village of Harrison limits. In addition, the applicant noted that it had not made any PILOT payment to the Village. Commission staff is concerned that this discrepancy may have resulted in customer rates that were overstated and believes the applicant should conduct further review to support an accurate calculation of the appropriate PILOT calculation. Because both Menasha and the applicant submitted information about the PILOT payment several months after Commission staff filed its exhibits and after the hearing, Commission staff did not adjust its exhibits for this rate case. Instead, the Commission determines it is reasonable that the applicant submit an application for a water rate adjustment within six months of this Final Decision including information and analysis to support an accurate split of plant assets between those located in the Village and those located outside the Village. The Commission further determines it reasonable that the applicant base its analysis on actual, rather than estimated, information. The Commission determines it is reasonable that the applicant be required to provide detailed information about its PILOT payments to the Village since the date the utility was established to present. Finally, the Commission finds it reasonable to require the applicant submit an application for a water rate adjustment that includes the information and analysis described above within six months of this Final Decision. These requirements are necessary to ensure the Utility's rates are just and reasonable in light of the timing when additional information was submitted by the parties in this proceeding.

Cost of Service

Commission staff submitted for the record an analysis of the cost of supplying water for general service and for public fire protection service. Commission staff used the base-extra

capacity cost allocation method for the analysis. Under this method, the operating expenses are allocated first to the service cost functional components of base, customer, extra-capacity maximum-day and extra capacity maximum-hour demand, and fire protection and then to each of the customer classes served. Summaries of these analyses are shown in Schedules 8 and 11 of Ex.-PSC-COSS and Rate Design, Commission staff's proposal in the record in this proceeding. ([PSC REF#: 394762.](#)) Appendix B shows customer class revenue requirements resulting from the cost analysis compared with revenues at authorized rates.

Rates

Water service rates authorized in this Final Decision will result in an estimated net operating income of approximately \$64,552, which provides a 6.00 percent allowance of the water utility operations and maintenance expenses. Commission staff provided the applicant with Commission staff's proposed rates for review prior to the hearing, and the applicant had no objection to these rates.

As shown in attached Appendix B, the base-extra capacity cost allocation method results in a relatively wide range of increases in the charges to the various general service customer classes to reflect the cost of providing service to such classes. The percentage rate increase to any individual customer will not necessarily equal the overall percentage increase to the associated customer class, but rather will depend on the specific water use of that customer.

The authorized rates as set forth in Appendix C are based on the cost of providing service to various customer classes or types of service. All customers will be required to pay an appropriate amount for the service provided.

Commission staff computed some typical water bills for single family residential, multifamily residential, commercial, industrial, and public authority customers using Schedule Mg-1 to compare present rates with the new rates. That comparison is set forth in Appendix D.

The overall increase in annual revenues is 6.53 percent, and is comprised of a 10.90 increase in general service charges and a 14.20 percent decrease in public fire protection (PFP) charges. A typical single family residential customer's bill, including PFP charges, will rise 25.43 percent. Rates have risen because of a 297.78 percent increase in gross plant investment and a 664.25 percent increase in operating expenses since the applicant's last conventional rate case in 1995. The typical bills calculated using the authorized rates are approximately average when compared with those of similarly sized water utilities in the state.

The larger increase in general service charges results from a greater proportion of the annual operating costs being allocated to general service compared to what was allocated at the time of the applicant's last rate proceeding and is based on current ratios of maximum general service demand to available system fire protection capacity. The larger increase in general service charges is reasonable, in that it reflects the cost of providing service appropriately.

The applicant requested rates that would provide for direct billing of water utility public fire protection costs to general service customers. ([PSC REF#: 375388.](#)) This request conforms to Wis. Stat. § 196.03(3)(b), which provides municipalities the option to include the public fire protection charges directly in the water utility bills of general service customers. As requested, authorized rates as set forth in Appendix C, Schedule F-1 provide for the direct charging of public fire protection costs to general service customers. These rates are reasonable and just. All customers will be required to pay an appropriate amount for the service provided.

The applicant has agreed to revise its tariff provisions (operating rules and main extension rules) to be consistent with those of other Wisconsin water utilities. The proposed rules were incorporated into the record by receipt of Ex.-PSC-COSS and Rate Design which incorporates the rules by reference. They are in accordance with Commission policy and the Wisconsin Administrative Code.

Effective Date

The test year commenced on January 1, 2019. Pursuant to Wis. Stat. § 196.19, the changes in rates and tariff provisions that are authorized in this Final Decision take effect no sooner than one day after the date of service, provided that these rates and tariff provisions are filed with the Commission, and the applicant makes a copy of the new rates available to the public before this date by placing a copy of the new rates at locations where customer payments are accepted, on the applicant's website, or in a form and place that is otherwise readily accessible to the public.

Order

1. This Final Decision takes effect one day after the date of service.
2. The authorized rate increases and tariff provisions shall take effect no sooner than one day after the day the applicant has: (a) filed these rates and tariff provisions with the Commission; and (b) made them available to the public at locations where customer payments are accepted, on the applicant's website, or in a form and place that is otherwise readily accessible to the public, pursuant to Wis. Stat. § 196.19 and Wis. Admin. Code § PSC 185.33(1)(f). If a copy of the new rates and tariff provisions is not made available to the public when they

Docket 6335-WR-103

are filed with the Commission, the new rates and tariff provisions shall take effect one day after the day they are made available to the public.

3. The rates approved in this docket shall take effect no later than 90 days from the service date of this Final Decision or as directed by the Commission or Commission staff.

4. The applicant shall stop charging the Facilities Connection Fee.

5. The applicant shall refund the \$297,371 in water Facilities Connection Fees it has collected from water customers.

6. The applicant shall submit an application for a water rate adjustment within six months of this Final Decision.

7. To the extent possible, the applicant shall determine a split of plant assets located inside the Village and plant assets located outside the Village based on actual, rather than estimated, information and shall include this information and analysis in its rate adjustment application.

8. The applicant shall provide detailed information about its PILOT payments to the Village since the date the utility was established to present.

9. Jurisdiction is retained.

Dated at Madison, Wisconsin, December 7, 2020.

PUBLIC SERVICE COMMISSION OF WISCONSIN
4822 Madison Yards Way
P.O. Box 7854
Madison, Wisconsin 53707-7854

**NOTICE OF RIGHTS FOR REHEARING OR JUDICIAL REVIEW, THE
TIMES ALLOWED FOR EACH, AND THE IDENTIFICATION OF THE
PARTY TO BE NAMED AS RESPONDENT**

The following notice is served on you as part of the Commission's written decision. This general notice is for the purpose of ensuring compliance with Wis. Stat. § 227.48(2), and does not constitute a conclusion or admission that any particular party or person is necessarily aggrieved or that any particular decision or order is final or judicially reviewable.

PETITION FOR REHEARING

If this decision is an order following a contested case proceeding as defined in Wis. Stat. § 227.01(3), a person aggrieved by the decision has a right to petition the Commission for rehearing within 20 days of the date of service of this decision, as provided in Wis. Stat. § 227.49. The date of service is shown on the first page. If there is no date on the first page, the date of service is shown immediately above the signature line. The petition for rehearing must be filed with the Public Service Commission of Wisconsin and served on the parties. An appeal of this decision may also be taken directly to circuit court through the filing of a petition for judicial review. It is not necessary to first petition for rehearing.

PETITION FOR JUDICIAL REVIEW

A person aggrieved by this decision has a right to petition for judicial review as provided in Wis. Stat. § 227.53. In a contested case, the petition must be filed in circuit court and served upon the Public Service Commission of Wisconsin within 30 days of the date of service of this decision if there has been no petition for rehearing. If a timely petition for rehearing has been filed, the petition for judicial review must be filed within 30 days of the date of service of the order finally disposing of the petition for rehearing, or within 30 days after the final disposition of the petition for rehearing by operation of law pursuant to Wis. Stat. § 227.49(5), whichever is sooner. If an *untimely* petition for rehearing is filed, the 30-day period to petition for judicial review commences the date the Commission serves its original decision.¹ The Public Service Commission of Wisconsin must be named as respondent in the petition for judicial review.

If this decision is an order denying rehearing, a person aggrieved who wishes to appeal must seek judicial review rather than rehearing. A second petition for rehearing is not permitted.

Revised: March 27, 2013

Harrison Utilities

Purchased Water Adjustment Clause

Harrison Utilities (utility) may apply a purchased water adjustment clause (PWAC) to its water rates set forth under Schedules F-1 and Mg-1 to reflect an increase or decrease in the rates charged by its wholesale water supplier, Appleton Water Department (wholesaler), **and only when the wholesaler’s rates are adjusted through the conventional rate case process.** Adjustments under this PWAC that result in an increase cannot be effective until the utility has filed the PWAC application with the Public Service Commission (Commission), the utility provides notice to its customers of such change in rates, and the Commission holds a public hearing and authorizes the rate adjustments in a Final Decision.

Calculation of Adjusted Monthly Public Fire Protection Service Charges - - - F-1

$$C = Z \times (1 + P)$$

$$P = (N - B) / T$$

Where: C = Adjusted Schedule F-1 monthly retail service charges rounded up to the nearest cent.

Z = Current Schedule F-1 direct monthly retail service charges.

P = Adjustment factor rounded up to the nearest hundredth of a percent, which is four places past the decimal point (.XXXX).

N = New monthly wholesale public fire protection service charge.

B = Current monthly wholesale public fire protection service charge.

T = Total monthly dollar revenue from monthly retail service charges per rate Schedule F-1.

Public Service Commission of Wisconsin

Harrison Utilities

Purchased Water Adjustment Clause

Calculation of Adjusted Monthly Service Charges - - - Mg-1

$$C = Z \times (1 + P)$$

$$P = (N - B) / T$$

Where: C = Adjusted Schedule Mg-1 monthly retail service charges rounded up to the nearest cent.

Z = Current Schedule Mg-1 monthly retail service charges.

P = Adjustment factor rounded up to the nearest hundredth of a percent, which is four places past the decimal point (.XXXX).

N = New monthly wholesale service charge.

B = Current monthly wholesale service charge.

T = Total monthly dollar revenue from monthly retail service charges per Schedule Mg-1.

Commodity Charge Adjustment - - - Mg-1

$$AVBR = VBR + A$$

Where: AVBR = Adjusted Schedule Mg-1 retail volume block rates rounded up to the nearest cent.

VBR = Current Schedule Mg-1 retail volume block rates.

A = New wholesale volume charge less the current wholesale volume charge.

Public Service Commission of Wisconsin

Harrison Utilities

Public Fire Protection Service

Public fire protection service shall include the use of hydrants for fire protection service only and such quantities of water as may be demanded for the purpose of extinguishing fires within the service area. This service shall also include water used for testing equipment and training personnel. For all other purposes, the metered or other rates set forth, or as may be filed with the Public Service Commission shall apply.

Under Wis. Stat. § 196.03(3)(b), the municipality has chosen to have the utility bill the retail general service customers for public fire protection service.

Monthly Public Fire Protection Service Charges:

5/8 - inch meter:	\$ 5.35	3 - inch meter:	\$ 80.00
3/4 - inch meter:	\$ 5.35	4 - inch meter:	\$ 134.00
1 - inch meter:	\$ 13.35	6 - inch meter:	\$ 267.00
1 1/4 - inch meter:	\$ 19.80	8 - inch meter:	\$ 428.00
1 1/2 - inch meter:	\$ 26.75	10 - inch meter:	\$ 642.00
2 - inch meter:	\$ 42.70	12 - inch meter:	\$ 855.00

Customers who are provided service under Schedules Mg-1, Ug-1, or Sg-1 shall also be subject to the charges in this schedule according to the size of their primary meter.

Billing: Same as Schedule Mg-1.

Public Service Commission of Wisconsin

Harrison Utilities

Private Fire Protection Service - Unmetered

This service shall consist of permanent or continuous unmetered connections to the main for the purpose of supplying water to private fire protection systems such as automatic sprinkler systems, standpipes, and private hydrants. This service shall also include reasonable quantities of water used for testing check valves and other backflow prevention devices.

Monthly Private Fire Protection Service Demand Charges:

2 - inch or smaller connection:	\$	6.00
3 - inch connection:	\$	11.00
4 - inch connection:	\$	18.00
6 - inch connection:	\$	36.00
8 - inch connection:	\$	58.00
10 - inch connection:	\$	88.00
12 - inch connection:	\$	116.00
14 - inch connection:	\$	145.00
16 - inch connection:	\$	174.00

Billing: Same as Schedule Mg-1.

Public Service Commission of Wisconsin

Harrison Utilities

General Service - Metered

Monthly Service Charges:

5/8 - inch meter:	\$ 12.75	3 - inch meter:	\$ 85.00
3/4 - inch meter:	\$ 12.75	4 - inch meter:	\$ 125.00
1 - inch meter:	\$ 19.85	6 - inch meter:	\$ 189.00
1 1/4 - inch meter:	\$ 26.50	8 - inch meter:	\$ 272.00
1 1/2 - inch meter:	\$ 33.75	10 - inch meter:	\$ 373.00
2 - inch meter:	\$ 59.00	12 - inch meter:	\$ 478.00

Plus Volume Charges:

All water used monthly: \$5.71 per 1,000 gallons

Billing: Bills for water service are rendered monthly and become due and payable upon issuance following the period for which service is rendered. A late payment charge of 1 percent per month will be added to bills not paid within 20 days of issuance. This late payment charge will be applied to the total unpaid balance for utility service, including unpaid late payment charges. The late payment charge is applicable to all customers. The utility customer may be given a written notice that the bill is overdue no sooner than 20 days after the bill is issued. Unless payment or satisfactory arrangement for payment is made within the next 10 days, service may be disconnected pursuant to Wis. Adm. Code ch. PSC 185.

Combined Metering: Volumetric meter readings will be combined for billing if the utility for its own convenience places more than one meter on a single water service lateral. Multiple meters placed for the purpose of identifying water not discharged into the sanitary sewer are not considered for utility convenience and shall not be combined for billing. This requirement does not preclude the utility from combining readings when metering configurations support such an approach. Meter readings from individually metered separate service laterals shall not be combined for billing purposes.

Public Service Commission of Wisconsin

Harrison Utilities

Other Charges

Payment Not Honored by Financial Institution Charge: The utility shall assess a \$25.00 charge when a payment rendered for utility service is not honored by the customer's financial institution. This charge may not be in addition to, but may be inclusive of, other such charges when the payment was for multiple services.

Real Estate Closing Account Charge: The utility shall assess a \$25.00 charge whenever a customer or the customer's agent requests written documentation from the utility of the customer's account status in connection with a real estate closing.

Billing: Same as Schedule Mg-1.

Public Service Commission of Wisconsin

Harrison Utilities

Public Service

Metered Service

Water used by the Village of Harrison on an intermittent basis for flushing sewers, street washing, flooding skating rinks, drinking fountains, etc., shall be metered and billed according to the rates set forth in Schedule Mg-1.

Unmetered Service

Where it is impossible to meter the service, the utility shall estimate the volume of water used based on the pressure, size of opening, and the period of time the water is used. The estimated quantity shall be billed at the volumetric rates set forth in Schedule Mg-1, excluding any service charges.

Billing: Same as Schedule Mg-1.

Public Service Commission of Wisconsin

Harrison Utilities

General Water Service - Unmetered

Service may be supplied temporarily on an unmetered basis where the utility cannot immediately install a water meter, including water used for construction. Unmetered service shall be billed the amount that would be charged to a metered residential customer using 4,000 gallons of water monthly under Schedule Mg-1, including the service charge for a 5/8-inch meter. If the utility determines that actual usage exceeds 4,000 gallons of water monthly, an additional charge for the estimated excess usage shall be made according to the rates under Schedule Mg-1.

This schedule applies only to customers with a 1-inch or smaller service connection. For customers with a larger service connection, the utility shall install a temporary meter and charges shall be based on the rates set forth under Schedule Mg-1.

Billing: Same as Schedule Mg-1.

Public Service Commission of Wisconsin

Harrison Utilities

Seasonal Service

Seasonal customers are general service customers who voluntarily request disconnection of water service and who resume service at the same location within 12 months of the disconnection, unless service has been provided to another customer at that location in the intervening period. The utility shall bill seasonal customers the applicable service charges under Schedule Mg-1 year-round, including the period of temporary disconnection.

Seasonal service shall include customers taking service under Schedule Mg-1, Schedule Ug-1, or Schedule Am-1.

Upon reconnection, the utility shall apply a charge under Schedule R-1 and require payment of any unpaid charges under this schedule.

Billing: Same as Schedule Mg-1, unless the utility and customer agree to an alternative payment schedule for the period of voluntary disconnection.

Public Service Commission of Wisconsin

Harrison Utilities

Bulk Water

All bulk water supplied from the water system through hydrants or other connections shall be metered or estimated by the utility. Utility personnel or a party approved by the utility shall supervise the delivery of water.

Bulk water sales are:

- A. Water supplied by tank trucks or from hydrants for the purpose of extinguishing fires outside the utility's service area;
- B. Water supplied by tank trucks or from hydrants for purposes other than extinguishing fires, such as water used for irrigation or filling swimming pools; or,
- C. Water supplied from hydrants or other temporary connections for general service type applications, except that Schedule Ug-1 applies for water supplied for construction purposes.

A service charge of \$25.00 and a charge for the volume of water used shall be billed to the party using the water. The volumetric charge shall be calculated using the highest volumetric rate for residential customers under Schedule Mg-1. In addition, for meters that are assigned to bulk water customers for more than 7 days, the applicable service charge in Schedule Mg-1 will apply after the first 7 days.

The water utility may require a reasonable deposit for the temporary use of its equipment under this and other rate schedules. The deposit(s) collected shall be refunded upon return of the utility's equipment. Damaged or lost equipment shall be repaired or replaced at the customer's expense.

Billing: Same as Schedule Mg-1.

Public Service Commission of Wisconsin

Harrison Utilities

Reconnection Charges

The utility shall assess a charge to reconnect a customer, which includes reinstalling a meter and turning on the valve at the curb stop, if necessary. A utility may not assess a charge for disconnecting a customer.

During normal business hours: \$25.00

After normal business hours: \$35.00

Billing: Same as Schedule Mg-1.

Public Service Commission of Wisconsin

Harrison Utilities

Water Lateral Installation Charge

The utility shall charge a customer for installing a water service lateral from the main through curb stop and box if these costs are not contributed as part of a subdivision development or otherwise recovered under Wis. Stats. Chapter 66. The charges shall be as follows:

¾-inch or 1-inch copper water service	\$500.00
Larger sized service	Actual Cost

Billing: Same as Schedule Mg-1.

Public Service Commission of Wisconsin

Harrison Utilities

Water Utility Operating Rules

Compliance with Rules

All persons now receiving water service from this water utility, or who may request service in the future, shall be considered as having agreed to be bound by the rules and regulations as filed with the Public Service Commission of Wisconsin.

Establishment of Service

Application for water service may be made in writing on a form furnished by the water utility. The application will contain the legal description of the property to be served, the name of the owner, the exact use to be made of the service, and the size of the service lateral and meter desired. Note particularly any special refrigeration, fire protection, or water-consuming air-conditioning equipment.

Service will be furnished only if (1) the premises have a frontage on a properly platted street or public strip in which a cast iron or other long-life water main has been laid, or where the property owner has agreed to and complied with the provisions of the water utility's filed main extension rule, (2) the property owner has installed or agrees to install a service lateral from the curb stop to the point of use that is not less than 6 feet below the surface of an established or proposed grade and meets the water utility's specifications, and (3) the premises have adequate piping beyond the metering point.

The owner of a multi-unit dwelling has the option of being served by individual metered water service to each unit. The owner, by selecting this option, is required to provide interior plumbing and meter settings to enable individual metered service to each unit and individual disconnection without affecting service to other units. Each meter and meter connection will be treated as a separate water utility account for the purpose of the filed rules and regulations.

No division of the water service lateral to any lot or parcel of land shall be made for the extension and independent metering of the supply to an adjoining lot or parcel of land. Except for duplexes, no division of a water service lateral shall be made at the curb for separate supplies for two or more separate premises having frontage on any street or public service strip, whether owned by the same or different parties. Duplexes may be served by one lateral provided (1) individual metered service and disconnection is provided and (2) it is permitted by local ordinance.

Buildings used in the same business, located on the same parcel, and served by a single lateral may have the customer's water supply piping installed to a central point so that volume can be metered in one place.

The water utility may withhold approval of any application where full information of the purpose of such supply is not clearly indicated and set forth by the applicant property owner.

Public Service Commission of Wisconsin

Harrison Utilities

Water Utility Operating Rules

Reconnection of Service

Where the water utility has disconnected service at the customer's request, a reconnection charge shall be made when the customer requests reconnection of service. See Schedule R-1 for the applicable rate.

A reconnection charge shall also be required from customers whose services are disconnected (shut off at curb stop box) because of nonpayment of bills when due. See Schedule R-1 for the applicable rate.

If reconnection is requested for the same location by any member of the same household, or, if a place of business, by any partner of the same business, it shall be considered as the same customer.

Temporary Metered Service, Meter, and Deposits

An applicant for temporary water service on a metered basis shall make and maintain a monetary deposit for each meter installed as security for payment for use of water and for such other charges which may arise from the use of the supply. A charge shall be made for setting the valve and furnishing and setting the meter. See Schedule BW-1 for the applicable rate.

Water for Construction

When water is requested for construction purposes or for filling tanks or other such uses, an application shall be made to the water utility, in writing, giving a statement of the amount of construction work to be done or the size of the tank to be filled, etc. Payment for the water for construction may be required in advance at the scheduled rates. The service lateral must be installed into the building before water can be used. No connection with the service lateral at the curb shall be made without special permission from the water utility. In no case will any employee of the water utility turn on water for construction work unless the contractor has obtained permission from the water utility.

Customers shall not allow contractors, masons, or other persons to take unmetered water from their premises without permission from the water utility. Any customer failing to comply with this provision may have water service discontinued and will be responsible for the cost of the estimated volume of water used.

Public Service Commission of Wisconsin

Harrison Utilities

Water Utility Operating Rules

Use of Hydrants

In cases where no other supply is available, permission may be granted by the water utility to use a hydrant. No hydrant shall be used until the proper meter and valve are installed. In no case shall any valve be installed or moved except by an employee of the water utility.

Before a valve is set, payment must be made for its setting and for the water to be used at the scheduled rates. Where applicable, see Schedule BW-1 for deposits and charges. Upon completing the use of the hydrant, the customer must notify the water utility to that effect.

Operation of Valves and Hydrants and Unauthorized Use of Water - Penalty

Any person who shall, without authority of the water utility, allow contractors, masons, or other unauthorized persons to take water from their premises, operate any valve connected with the street or supply mains, or open any fire hydrant connected with the distribution system, except for the purpose of extinguishing fire, or who shall wantonly damage or impair the same, shall be subject to a fine as provided by municipal ordinance. Utility permission for the use of hydrants applies only to such hydrants that are designated for the specific use.

Refunds of Monetary Deposits

All money deposited as security for payment of charges arising from the use of temporary water service on a metered basis, or for the return of a hydrant valve and fixtures if the water is used on an unmetered basis, will be refunded to the depositor on the termination of the use of water, the payment of all charges levied against the depositor, and the return of the water utility's equipment.

Service Laterals

No water service lateral shall be laid through any trench having cinders, rubbish, rock or gravel fill, or any other material which may cause injury to or disintegration of the service lateral, unless adequate means of protection are provided by sand filling or such other insulation as may be approved by the water utility. Service laterals passing through curb or retaining walls shall be adequately safeguarded by provision of a channel space or pipe casing not less than twice the diameter of the service connection. The space between the service lateral and the channel or pipe casing shall be filled and lightly caulked with an oakum, mastic cement, or other resilient material and made impervious to moisture.

In backfilling the pipe trench, the service lateral must be protected against injury by carefully hand tamping the ground filling around the pipe. There should be at least 6 inches of ground filling over the pipe, and it should be free from hard lumps, rocks, stones, or other injurious material.

Public Service Commission of Wisconsin

Harrison Utilities

Water Utility Operating Rules

Service Laterals (continued)

All water service laterals shall be of undiminished size from the street main into the point of meter placement. Beyond the meter outlet valve, the piping shall be sized and proportioned to provide, on all floors, at all times, an equitable distribution of the water supply for the greatest probable number of fixtures or appliances operating simultaneously.

Replacement and Repair of Service Laterals

The service lateral from the main to and through the curb stop will be maintained and kept in repair and, when worn out, replaced at the expense of the water utility. The property owner shall maintain the service lateral from the curb stop to the point of use.

If an owner fails to repair a leaking or broken service lateral from the curb to the point of metering or use within such time as may appear reasonable to the water utility after notification has been served on the owner by the water utility, the water will be shut off and will not be turned on again until the repairs have been completed.

Abandonment of Service

If a property owner changes the use of a property currently receiving water service such that water service will no longer be needed in the future, the water utility may require the abandonment of the water service at the water main. In such case, the property owner may be responsible for all removal and/or repair costs, including the water main and the utility portion of the water service lateral.

Charges for Water Wasted Due to Leaks

See Wis. Admin. Code § PSC 185.35 or Schedule X-4, if applicable.

Thawing Frozen Service Laterals

See Wis. Admin. Code § PSC 185.88 or Schedule X-4, if applicable.

Curb Stop Boxes

The curb stop box is the property of the water utility. The water utility is responsible for its repair and maintenance. This includes maintaining, through adjustment, the curb stop box at an appropriate grade level where no direct action by the property owner or occupant has contributed to an elevation problem. The property owner is responsible for protecting the curb stop box from situations that could obstruct access to it or unduly expose it to harm. The water utility shall not be liable for failure to locate the curb stop box and shut off the water in case of a leak on the owner's premises.

Public Service Commission of Wisconsin

Harrison Utilities

Water Utility Operating Rules

Installation of Meters

Meters will be owned, furnished, and installed by the water utility or a utility-approved contractor and are not to be disconnected or tampered with by the customer. All meters shall be so located that they shall be protected from obstructions and permit ready access for reading, inspection, and servicing, such location to be designated or approved by the water utility. All piping within the building must be supplied by the owner. Where additional meters are desired by the owner, the owner shall pay for all piping. Where applicable, see Schedule Am-1 for rates.

Repairs to Meters

Meters will be repaired by the water utility, and the cost of such repairs caused by ordinary wear and tear will be borne by the water utility.

Repair of any damage to a meter resulting from the carelessness of the owner of the premises, owner's agent, or tenant, or from the negligence of any one of them to properly secure and protect same, including any damage that may result from allowing a water meter to become frozen or to be damaged from the presence of hot water or steam in the meter, shall be paid for by the customer or the owner of the premises.

Service Piping for Meter Settings

Where the original service piping is installed for a new metered customer, where existing service piping is changed for the customer's convenience, or where a new meter is installed for an existing unmetered customer, the owner of the premises at his/her expense shall provide a suitable location and the proper connections for the meter. The meter setting and associated plumbing shall comply with the water utility's standards. The water utility should be consulted as to the type and size of the meter setting.

Turning on Water

The water may only be turned on for a customer by an authorized employee of the water utility. Plumbers may turn the water on to test their work, but upon completion must leave the water turned off.

Sprinkling Restrictions and Emergency Water Conditions

Where the municipality has a policy regarding sprinkling restrictions and/or emergency water conditions, failure to comply with such may result in disconnection of service.

See Wis. Admin. Code § PSC 185.37.

Public Service Commission of Wisconsin

Harrison Utilities

Water Utility Operating Rules

Failure to Read Meters

Where the water utility is unable to read a meter, the fact will be plainly indicated on the bill, and either an estimated bill will be computed or the minimum charge applied. The difference shall be adjusted when the meter is again read, that is, the bill for the succeeding billing period will be computed with the gallons or cubic feet in each block of the rate schedule doubled, and credit will be given on that bill for the amount of the bill paid the preceding period. Only in unusual cases shall more than three consecutive estimated or minimum bills be rendered.

If the meter is damaged (see Surreptitious Use of Water) or fails to operate, the bill will be based on the average use during the past year, unless there is some reason why the use is not normal. If the average use cannot be properly determined, the bill will be estimated by some equitable method.

See Wis. Admin. Code § PSC 185.33.

Complaint Meter Tests

See Wis. Admin. Code § PSC 185.77.

Inspection of Premises

During reasonable hours, any officer or authorized employee of the water utility shall have the right of access to the premises supplied with service for the purpose of inspection or for the enforcement of the water utility's rules and regulations. Whenever appropriate, the water utility will make a systematic inspection of all unmetered water taps for the purpose of checking waste and unnecessary use of water.

See Wis. Stat. § 196.171.

Vacation of Premises

When premises are to be vacated, the water utility shall be notified, in writing, at once, so that it may remove the meter and shut off the water supply at the curb stop. The owner of the premises shall be liable for prosecution for any damage to the water utility's property. See "Abandonment of Service" in Schedule X-1 for further information.

Deposits for Residential Service

See Wis. Admin. Code § PSC 185.36.

Public Service Commission of Wisconsin

Harrison Utilities

Water Utility Operating Rules

Deposits for Nonresidential Service

See Wis. Admin. Code § PSC 185.361.

Deferred Payment Agreement

See Wis. Admin. Code § PSC 185.38 or Schedule X-4, if applicable.

Dispute Procedures

See Wis. Admin. Code § PSC 185.39.

Disconnection and Refusal of Service

See Wis. Admin. Code § PSC 185.37.

The following is an example of a disconnection notice that the utility may use to provide the required notice to customers.

DISCONNECTION NOTICE

Dear Customer:

The bill enclosed with this notice includes your current charge for water utility service and your previous unpaid balance.

You have 10 days to pay the water utility service arrears or your service is subject to disconnection.

If you fail to pay the service arrears or fail to contact us within the 10 days allowed to make reasonable deferred payment arrangement or other suitable arrangement, we will proceed with disconnection action.

To avoid the inconvenience of service interruption and an additional charge of (amount) for reconnection, we urge you to pay the full arrears IMMEDIATELY AT ONE OF OUR OFFICES.

If you have entered into a Deferred Payment Agreement with us and have failed to make the deferred payments you agreed to, your service will be subject to disconnection unless you pay the entire amount due within 10 days.

If you have a reason for delaying the payment, call us and explain the situation.

Public Service Commission of Wisconsin

Harrison Utilities

Water Utility Operating Rules

Disconnection and Refusal of Service (continued)

DISCONNECTION NOTICE (continued)

PLEASE CALL THIS TELEPHONE NUMBER, (telephone number), IMMEDIATELY IF:

1. You dispute the notice of delinquent account.
2. You have a question about your water utility service arrears.
3. You are unable to pay the full amount of the bill and are willing to enter into a deferred payment agreement with us.
4. There are any circumstances you think should be taken into consideration before service is discontinued.
5. Any resident is seriously ill.

Illness Provision: If there is an existing medical emergency in your home and you furnish the water utility with a statement signed by either a licensed Wisconsin physician or a public health official, we will delay disconnection of service up to 21 days. The statement must identify the medical emergency and specify the period of time during which disconnection will aggravate the existing emergency.

Deferred Payment Agreements: If you are a residential customer and you are unable to pay the full amount of the water utility service arrears on your bill, you may contact the water utility to discuss arrangements to pay the arrears over an extended period of time.

This time payment agreement will require:

1. Payment of a reasonable amount at the time the agreement is made.
2. Payment of the remainder of the outstanding balance in monthly installments over a reasonable length of time.
3. Payment of all future water utility service bills in full by the due date.

In any situation where you are unable to resolve billing disputes or disputes about the grounds for proposed disconnection through contacts with our water utility, you may make an appeal to the Public Service Commission of Wisconsin by calling (800) 225-7729.

Public Service Commission of Wisconsin

Harrison Utilities

Water Utility Operating Rules

Collection of Overdue Bills

An amount owed by the customer may be levied as a tax as provided in Wis. Stat. § 66.0809.

Surreptitious Use of Water

When the water utility has reasonable evidence that a person is obtaining water, in whole or in part, by means of devices or methods used to stop or interfere with the proper metering of the water utility service being delivered, the water utility reserves the right to estimate and present immediately a bill for unmetered service as a result of such interference, and such bill shall be payable subject to a 24-hour disconnection of service. If the water utility disconnects the service for any such reason, the water utility will reconnect the service upon the following conditions:

- A. The customer will be required to deposit with the water utility an amount sufficient to guarantee the payment of the bills for water utility service.
- B. The customer will be required to pay the water utility for any and all damages to water utility equipment resulting from such interference with the metering.
- C. The customer must further agree to comply with reasonable requirements to protect the water utility against further losses.

See Wis. Stat. §§ 98.26 and 943.20.

Repairs to Mains

The water utility reserves the right to shut off the water supply in the mains temporarily to make repairs, alterations, or additions to the plant or system. When the circumstances will permit, the water utility will give notification, by newspaper publication or otherwise, of the discontinuance of the water supply. No credit will be allowed to customers for such temporary suspension of the water supply.

See Wis. Admin. Code § PSC 185.87.

Duty of Water Utility with Respect to Safety of the Public

It shall be the duty of the water utility to see that all open ditches for water mains, hydrants, and service laterals are properly guarded to prevent accident to any person or vehicle, and at night there shall be displayed proper signal lighting to insure the safety of the public.

Public Service Commission of Wisconsin

Harrison Utilities

Water Utility Operating Rules

Handling Water Mains and Service Laterals in Excavation Trenches

Contractors must call Digger’s Hotline and ensure a location is done to establish the existence and location of all water mains and service laterals as provided in Wis. Stat. § 182.0175. Where water mains or service laterals have been removed, cut, or damaged during trench excavation, the contractors must, at their own expense, cause them to be replaced or repaired at once. Contractors must not shut off the water service laterals to any customer for a period exceeding 6 hours.

Protective Devices

- A. Protective Devices in General: The owner or occupant of every premise receiving water supply shall apply and maintain suitable means of protection of the premise supply and all appliances against damage arising in any manner from the use of the water supply, variation of water pressure, or any interruption of water supply. Particularly, such owner or occupant must protect water-cooled compressors for refrigeration systems by means of high and/or low pressure safety cutout devices. There shall likewise be provided means for the prevention of the transmission of water ram or noise of operation of any valve or appliance through the piping of their own or adjacent premises.
- B. Relief Valves: On all "closed systems" (i.e., systems having a check valve, pressure regulator, reducing valve, water filter, or softener), an effective pressure relief valve shall be installed at or near the top of the hot water tank or at the hot water distribution pipe connection to the tank. No stop valve shall be placed between the hot water tank and the relief valve or on the drain pipe. See applicable plumbing codes.
- C. Air Chambers: An air chamber or approved shock absorber shall be installed at the terminus of each riser, fixture branch, or hydraulic elevator main for the prevention of undue water hammer. The air chamber shall be sized in conformance with local plumbing codes. Where possible, the air chamber should be provided at its base with a valve for water drainage and replenishment of air.

Cross-Connections

Every person owning or occupying a premise receiving municipal water supply shall maintain such municipal water supply free from any connection, either of a direct or of an indirect nature, with a water supply from a foreign source or of any manner of connection with any fixture or appliance whereby water from a foreign supply or the waste from any fixture, appliance, or waste or soil pipe may flow or be siphoned or pumped into the piping of the municipal water system.

See Wis. Admin. Code § NR 811.06.

Public Service Commission of Wisconsin

Harrison Utilities

Water Main Extension Rule

Water mains will be extended for new customers on the following basis:

- A. Where the cost of the extension is to immediately be collected through assessment by the municipality against the abutting property, the procedure set forth under Wis. Stat. § 66.0703 will apply, and no additional customer contribution to the utility will be required.

- B. Where the municipality is unwilling or unable to make a special assessment, the extension will be made on a customer-financed basis as follows:
 - 1. The applicant(s) will advance as a contribution in aid of construction the total amount equivalent to that which would have been assessed for all property under paragraph A.

 - 2. Part of the contribution required in paragraph B.1. will be refundable. When additional customers are connected to the extended main within 10 years of the date of completion, contributions in aid of construction will be collected equal to the amount which would have been assessed under paragraph A. for the abutting property being served. This amount will be refunded to the original contributor(s). In no case will the contributions received from additional customers exceed the proportionate amount which would have been required under paragraph A., nor will it exceed the total assessable cost of the original extension.

- C. When a customer connects to a transmission main or connecting loop installed at utility expense within 10 years of the date of completion, there will be a contribution required of an amount equivalent to that which would have been assessed under paragraph A.

Public Service Commission of Wisconsin

Harrison Utilities

Water Main Installations in Platted Subdivisions

Application for installation of water mains in regularly platted real estate development subdivisions shall be filed with the utility.

If the developer, or a contractor employed by the developer, is to install the water mains (with the approval of the utility), the developer shall be responsible for the total cost of construction.

If the utility or its contractor is to install the water mains, the developer shall be required to advance to the utility, prior to the beginning of the construction, the total estimated cost of the extension. If the final costs exceed estimated costs, an additional billing will be made for the balance of the cost due. This balance is to be paid within 30 days. If final costs are less than estimated, a refund of the overpayment will be made by the water utility.

Public Service Commission of Wisconsin

Harrison Utilities

Water Customer Supplemental Rules

Compliance with Rules

All persons now receiving water service from this water utility, or who may request service in the future, shall be considered as having agreed to be bound by the rules and regulations as filed with the Public Service Commission of Wisconsin.

Charges for Water Wasted Due to Leaks

Pursuant to Wis. Admin. Code § 185.35(6) and the utility's policy, when a leak unknown to the customer is found in an appliance or the plumbing, the utility shall estimate the water wasted due to the leak and bill for this excess usage at a reduced rate not less than the utility's cost. If this provision applies, the utility shall bill the customer for excess usage at the lowest volumetric rate in the utility's Schedule Mg-1, General Service - Metered. No additional adjustments shall be made for water supplied after the customer has been notified of the leak and has had an opportunity to correct the condition.

Thawing Frozen Service Laterals

See Wis. Admin. Code § PSC 185.88.
